Bachelor of Materials Science

GPA: 2.62

SUMMARY

Hello, I am May and 25 years old. I have a passion for coding. Then I started learning the basics of coding on YouTube. Practice doing exercises from small projects. And decided to study at boot camp to improve my own technical skills.

PROJECTS EXPERIENCE

Education project (mini-project):

Making an educational website, this project focuses on rendering responsive web pages and practicing Tailwind CSS. I am responsible for the review page, registration page, and footer contact page.

Framework, Tech-Stack and tools: Tailwind

Tourist attraction project (mini-project):

Making a tourist website where viewers can search for tourist attractions and click to read more, or the viewer can search from categories on the web page.

I wrote event handler functions for when the viewer clicked or added text to the input.

Framework, Tech-Stack and tools:

React JS, Tailwind, Axios

CourseFlow project (final-project):

The one-stop online class management system that caters to all your educational needs. Our system facilitates classroom management for both admins and users. Users can see all available class contents and materials. For administrators, they can organize curriculum management.

I am responsible for two parts:

1. Users, I am responsible for the registration page, the course detail page, and all Modal Confirmations.
2. Admins, I am responsible for adding the lesson page, lesson form, and login page.

Framework, Tech-Stack and tools:

React JS, Tailwind, Material UI, Axios, Formik and Yup, Supabase, Node and Express
